

### Chapter Three: *In Which Piglet Finds a Safe Place*

Piglet is anxious about going outside. His house is located close to both the Floody Place where he was once Entirely Surrounded by Water [1], and to the group of larch trees where a Woozle was nearly caught last winter [2]. Pooh tries to reassure Piglet that he does not have to worry about flooding (thanks to the umbrella-boat, the *Brain of Pooh*), or about the Woozle, since Woozles are evidently very shy. However, Pooh warns, the Wet Woozle can be a particularly Hostile Animal.

Woozles can range as far as 500 feet from the larch trees (“Where The Woozle Wasn’t” region), and the flood has been known to extend as far as 150 feet from the center of the “Floody River” stream section.

Make a map for Piglet of the area he should avoid.

- 1) Show the area with a flood risk,
- 2) Show the expected Woozle range, and
- 3) use a geoprocessing tool to indicate where a Wet Woozle might be.

Your polygons should not extend beyond the base map by Shepard and Cristopher Robin. Your map should include a title, your name, a north, a scale, and a legend which indicates clearly each area with a different fill color. The legend should not have default names. Also include other elements like the stream and the background to give context to the map. Your map should be zoomed to the area of interest to allow the viewer (Piglet, Adrianne and me) be able to see your result clearly. Upload your map to Sakai before the deadline.
